Time taken 14 mins 55 secs

Marks 8.00/10.00

Grade 80.00 out of 100.00

Scenario: While standing in line at a coffee shop, a person notices someone trying to peek at their screen as they type in a password on their laptop.

Question: What type of social engineering attack does this scenario illustrate?

Select one:

- ☐ a. Phishing
- ☐ b. Whaling
- ☒ c. Shoulder Surfing
- ☐ d. Vishing

Scenario: A hacker discovers sensitive financial records in a company's trash bin, which were not shredded before disposal.

Question: What type of information-gathering technique is described here?

Select one:

- ☒ a. Dumpster Diving
- ☐ b. Shoulder Surfing
- ☐ c. Baiting
- ☐ d. Vishing

Scenario: An attacker is found rummaging through the trash bins outside a corporate office, searching for discarded documents that might contain sensitive information like login credentials or personal data.

Question: What type of social engineering attack is being employed here?

Select one:

- ☐ a. Shoulder Surfing
- ☐ b. Baiting
- ☒ c. Dumpster Diving
- ☐ d. Vishing

Scenario: An employee receives an email claiming to be from their HR department, asking them to update their payroll information by clicking on a provided link.

Question: What kind of social engineering attack is this?

Select one:

- ☐ a. **Shoulder Surfing**
- ☐ b. **Dumpster Diving**
- ☐ c. **Whaling**
- ☒ d. **Phishing**

Scenario: A malicious website advertises a “free software download” that promises to improve computer performance. Once downloaded, it installs spyware on the user’s device.

Question: What social engineering method is being used here?

Select one:

- ☐ a. **Whaling**
- ☒ b. **Baiting**
- ☐ c. **Vishing**
- ☐ d. **Dumpster Diving**

Scenario: An attacker calls a bank customer, pretending to be from the fraud department. The attacker convinces the customer to verify their account information over the phone.

Question: What type of attack is taking place in this scenario?

Select one:

- ☐ a. **Vishing**
- ☐ b. **Shoulder Surfing**
- ☐ c. **Whaling**
- ☒ d. **Phishing**

Scenario: An employee uses an ATM at a crowded mall. While entering their PIN, they notice someone standing very close and trying to view the keypad.

Question: What attack technique is being attempted?

Select one:

- ☐ a. **Whaling**

- ☐ b. Phishing
- ☒ c. Shoulder Surfing
- ☐ d. Vishing

Scenario: A CEO receives a highly targeted email that appears to be from a partner organization, requesting immediate transfer of funds to close a deal.

Question: What specific type of phishing attack is described here?

Select one:

- ☐ a. Vishing
- ☐ b. Dumpster Diving
- ☐ c. Baiting
- ☒ d. Whaling

Scenario: A USB drive labeled "Executive Salary Report" is intentionally left in a company break room. An employee picks it up and plugs it into their computer to view the content, which installs malware.
